

How Your Bills Are Calculated

All rates are for a one-month period.
WITHIN CITY LIMITS – SINGLE FAMILY

| | |
|---|---------------------------|
| Water up to 2,240 Gallons flat charge | \$14.18 |
| After the minimum: | |
| Up to 3,240 gallons | \$3.55/per 1,000 gallons |
| Above 3,240 gallons | \$3.89/per 1,000 gallons |
| Sewer up to 2,240 Gallons flat charge | \$39.12 |
| After the minimum, between 2,240 and 37,400 gallons | \$7.823/per 1,000 gallons |
| Over 37,400 gallons | \$6.256/per 1,000 gallons |

Example:

Water

6,000 gallons of usage

2,240 (minimum) \$14.18

6,000 – 2,240 = 3,760 gallons over

1,000 (up to 3,240) x \$3.55= \$ 3.55

2,760 (over 3,240) x \$3.89 = \$10.74

Total Water Charge = \$28.47

Sewer

6,000 gallons of usage

2,240 (minimum) \$39.12

6,000 – 2,240 = 3,760 gallons

(3,760/1,000) x \$7.823 = \$29.41

Total Sewer Charge \$68.53

Sanitation Fee (Garbage) \$17.71 flat fee

Storm Water \$4.25/ERU as calculated by City Engr.

SEWER CEILING

Residential properties have one meter that measures water as it enters the residence. This meter is then used to bill for water as well as sewer. We are aware that during the summer months, not all water is going through the sewer, but rather it is being used outdoors for watering lawns, gardens, pools, etc. Since we have no way of measuring the sewer output, as a courtesy, we give you a discount on your sewer during the summer months by way of a "Sewer Ceiling." This sewer ceiling is the average of your water consumption during the winter months. We cap your sewer bill at this consumption level and do not bill you for any more than that consumption. Here is an example:

Average water consumed last winter = 2,250 gallons/month

During the month of July water consumed = 6,000 gallons

Total Sewer Bill (6,000 gal) = \$68.53

Capped Sewer Bill (2,250 gal) = \$39.20

At the conclusion of the summer season, the sewer ceiling is turned off for the winter.

Rates are Effective with bill due April 15, 2021
